

## TradeSun partners with Sustainable to further company ESG goals

**Del Mar, CA – May 9, 2022** – TradeSun, the leading provider of financial crime prevention and compliance solutions in trade, has partnered with Sustainable, the ESG data management and reporting platform, furthering the fintech firm’s commitment to sustainability.

TradeSun will leverage Sustainable’s platform to track key environmental, social and governance indicators, including organizational emissions, energy use, and company structure. The partnership supports TradeSun in meeting its ambitious sustainability goals and shaping future targets.

As ESG fast becomes the priority for business and society, it is imperative that companies operating across global trade, a major contributor to global business emissions, better measure their impact. Sustainable provides effective ESG software that uses industry-leading frameworks to enhance business operations and decision-making.

Nigel Hook, TradeSun CEO, said: “Companies across the trade spectrum must have clear and robust environmental, social and governance reporting if industry is to be sustainable and inclusive, and companies are to avoid greenwashing accusations. We are delighted to partner with the Sustainable team to further our ambitious sustainability goals.”

Wil Moushey, Sustainable Founder and CEO, said: “We are very excited to help TradeSun’s progress in its ESG journey and applaud Nigel and the rest of the team for their leadership in pushing the trade industry towards being more transparent about their impacts on our climate and society more broadly.”

**About TradeSun:** TradeSun is an innovator and leader in trade digitization. Our award-winning AI-powered platform for trade finance processing and compliance empowers our customers to reduce risk and fuel growth by leveraging state-of-the-art technologies. The TradeSun Platform is a one-stop solution that offers real-time compliance, covering trade-based money laundering, dual use goods, fair price, vessel tracking and sanctions. It also automates document review, significantly reducing processing times. Our executive team consists of highly experienced trade and technology professionals from many leading financial institutions: [TradeSun](#).

**About Sustainable:** Sustainable is transforming how enterprises manage Environmental, Social, and Governance (ESG) programs. Its ecosystem of products and services streamlines ESG data collection, performance management, and disclosure, so clients can focus more on making impact and less on managing it: [Sustainable](#).
